Fit-up Growing Line

Fit-up Growing Line has 2 production lines.

A production line for welding and a production line for tack welding.

Therefore, the processes happen simultaneously.

Fit-up Growing Line means;

- You achieve a significant time optimization of the welding process.
- You get the full output of the column & booms.
- No operator stands still during the processes with a Fit-up Growing Line.

Technical specifications

- Fit-up Growing Line is customized for all thicknesses and diameters.
- Low built fit-up to accommodate large diameter in production of towers, monopiles and tanks.
- Low built fit-up for easier access into the section.
