

APEX system

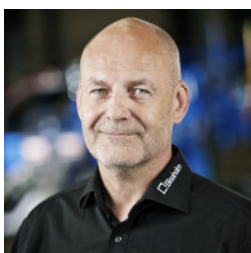

Blaaholm APEX system secures a high welding quality.

APEX system secures the welding head to be at the correct position, regardless of how oval the section is.

- Do you need the welding head always to be in the correct uphill/downhill position and with the same angle on the section?
- Are you interested in higher welding quality and easier operation for the operator?

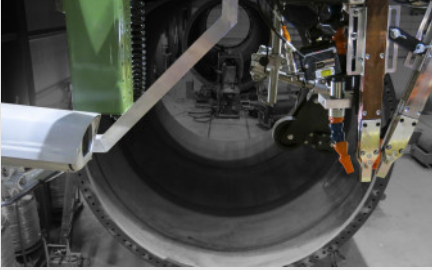

The Blaaholm developed APEX system can solve the challenges and ensure the high welding quality you are demanding. Contact us today.

APEX system

- APEX system controls and ensures that the welding head is in the correct uphill/downhill position.
- The system helps the operator with the correct position at any time.
- It means less work for the operator.
